PERSONAL STATEMENT

I have been a production manager for a workwear company for the past nine years and whilst the job provided me with financial security I found the repetition of doing the same thing every day very unfulfilling and tedious. I decided that I wanted to pursue a career that was more inline with my personality and found software development to be the natural choice as I am a creative person who enjoys problem solving and I have an educational background in IT.

TECHNICAL SKILLS

Language: Javascript
Front End: HTML5, CSS3, React
Back End: SQL, Express
Testing: Node.js, Jest

Creative Software:

- Adobe Photoshop
- Adobe Illustrator
- Adobe Dreamweaver

HOBBIES AND INTERESTS

- Hiking: I regularly go on walks and hikes locally but also enjoy going further afield to the Lake District and Wales when I'd like more of a challenge.
- Mountain Biking: I also enjoy mountain biking as a way to get outside and keep fit, I go to the trials at Gisburn Forest about once a month from Spring til Winter.
- PC Gaming: When I'm not outside I enjoy PC Gaming, upgrading my PC is also something I find satisfying as it allows me to improve the performance and graphics.
